

LOVEVADOS

AOMORI APPLE JUICE

Made from apples grown with love.

This juice has a refreshing aftertaste that you won't get tired of drinking.

By blending six varieties, including the popular "Kogyoku", with the rare and palatable "Koukou", the juice has an excellent balance of acidity, sweetness and aroma.

Blended with rare variety "Koukou"

There are only a few growers of 'Koukou' and it barely makes it to the market, but it has a rich aroma and lingering flavor, is a rich and delicious apple, and is eagerly eaten by people in Aomori who are picky about apples.

We juice delicious apples while they are still fresh. So we only manufacture it once a year.

Production runs from late December to late January. Because we use edible apples without refrigeration or freezing, year-round production is not possible.

Recommended ways to serve

Try straight or on the rock for the first time in order to know what it taste like.

More casual and refreshing ways to serve is that you put half soda or tonic water in , garnish with lime or mint.

We secretly enjoy putting a few drops into coffee or vanilla ice cream.
